Hear Ye, Hear Ye.- I am one of many Vietnamwar vetems that do not beleive that Oswald killed John F. Kennedy but that "The C.I.A. and L.B.J. killed J.F.K.". John F. Kennedy was kill killed because he and he allalone opposed the Vietnam war on mo moral grounds plus the fact that he could see who would benifit most and it would not be the U.S. of A. but England/Russia and the International Cartels that control the E.K.S. and of course the International Business Men that control them. Why England be cause of Malaysia and all the British investments there, if that went at that time the English rich and the expatriate americans that live there and the Netherlands (J. Paul Getty/ H.L. Hunt- Who was the rich Texas oil men and his investments at Jack Ruby bar before the killing of John F. Kennedy) faced socialism in America before they could transfer their holdings/ investments overseas to Swiss banks and their factories/ Technology to other countries with a cheaper labor base. Honor is aword not knowned in the world sinced J.F.K. died, and the world pays for it every day in arising crime rate that the police/armies cannot check, Drugs and Dopebrun ragged around the world, disrespect for parentnts that begat them for heaping dishonor apon them before they are bornand while growing up.

You see the new U.S. of A was to e the Common Market, controled by England of course, but before that the US of A had to be runned into the ground first and usedto further that goal and what better way than a war that makes moneyfor you and atthe sme time at as a cover while you transfer funds out ofthe countryas fast as it is made; then when the countrie collaspes you have the new U.S. of A the Common Market. You use a country to destroy itself to help you set up a newweconomic /power base, not only that but you could use it to wipe out large segments of the darker skinned people and the poorer class and move in people of your own choice. Remember Hamberger Hill Vietnam?) A funny thing hit me then, England has the largest immigration qutoa but i never ran into one person from England in my two plus years there; I talked with people in the navy, army and airforce

and they all say the same thing.Very,very odd since you hear english accentsup and down California;how come other nationalities have to serve right away, but the English? Was't it alsothe English who ran supplies up to Hainoi dailey?How odd for a N.A.T.O. ally of the U.S.of A. English shipping powers mademoney over their allies blood. Isay that the Western allies plus Russia were in this together, not only for profit but also to take the pressure off of Russia during the early China Russia border conflict(I960-I963). Imagine having 850 million plus nucleaur armed Orientals on your border. Thedeal was; take the pressure off us, contain China and open her up to trade and we will open up our (Russian) markets to you.Notice that as soon as contact was made with China Russia opened up trade with the Americans,Wheatdeals and Oil (Occiental Petrolium- Rich Oil men again),who ownes Occiental Oil International businessmen and England? Is it not connectedwith Occiental Insurance whichin turn isconnected with Banks, both domestic and foreign, Real Estate dealers are connected with banks like "The Bank of America, very strong in the finances of the Vietnam war". All are part ofthe Military Industrial Complex.Even trade unions wanted the war- stir things up for more jobs- production- minning-trucking-shippingetc etc. Ship guns out,receive your son back in a coffin. Remember when France "Threw" usout? 650 aircraft left France and oddly enough ,latteron, that is almost exactley the amount that formed the beach head in Viet Nam.Were we thrown out , really?I have a few pilot friends and they said that there were always two airfields open to them. It was just a juggling of the account books. Russia obviosly supplied a limmitted amount of out dated equipment and nothing of the more effective equip ment;if North Vietnam got to strong they juststopped the flow of supplies. Has Russia and the western alliance ever cooperated before; yes.Remember the Mig- I5 RussiaS first good jet fighter, well the jet it had was arolls-royce that was sold(not stolen) to them by England. in fact they sold them 50 jet engines(2 different types), they were im proved and used in the Mig-I5,I7 and I9.These engines hadonly military use not civilian.The U.S.of A. could have stopped this by trade restrictions but it did not,why?Goverments /big bussiness could always trade with the Communist; but for a small man to be called a red, pinko or communist meant a loss of civil rights and job.How 2 faced goverments are.

Notice this toplease, as soon as America got contact with China the troop strength in Vietnam by 50%(was dropped/reduced);proving that actions in Indo China depended on what China did mainly,not North Vietnam.

Lets look atsome of the equipment used and not used in Vietnam The F-I05 and F-4 can carry at lease I2,000 pounds of bombs rockets and napalm;the Mig-2I used by Noth Vietnam can carry the large amount of 500 pounds for a range of about I00 miles.Since there was about I,500 F-4s and F-I05s it would take 36,000 Mig-2Is to equal them in bomb load. The North Vietnamese had atotal of 50-I50 aircraft of alltypes.Actually the Americans had about 6,000 aircraft of all types,jets, heicopters, transports;about 3,000 of these were jet fighter bombers both airforce and navy.They would have needed at least 50,000 jet fighters to defend them selves plus the pilots they don't have and also the technicians to keep them in order;plus the fact that they have't enough land space to keep all of them.Russia is some ally, I50 planes;what alaugh.Acording to a Finnish mechanic,now astudent in the states, said thatwhen a canadian F-I04 Starfighter visited them(Finland) it completely outperformed the Mig-2I, which they have been flying sincen I963.Here is a plane the American airforce rejected by the late 60's completely outperforming the Mig-2I which the North Vietnamese stilluse.So we knew all about the Mig-2I in I963 since Finland is awestern leaning nation and always has been Plus the fact that Israel captured one in I966And afew more in the I967 war Israel let the Americans fly them in return for arms.The Mig-2I has a I2,000-I3,000 energy engine ,the F-4 has two I7,900 which equal35,800 units of energy, nearly 3 times as much power; the F-4(acording to pil ots that fly it) can hit Mach 3 and climb to over I00,000 feet,and has a range of over 2,000 miles.The Mig-2I can do only Mach2 clean,climb to 75,000 feet and has a range of about I,000 miles.The ground attack assesories were never given to it(rocket pods).Low level penetration is immpossible to stop;remember the Mig-I7 that defected from Cuba and landed undected at the air base where President Nixons plane was? The Mig-I7 was only doing 400 miles an hour yet got past advanced radar and the worlds most advanced interceptors,that were in Flordia at the time. So they could have hit us at Khe san with hit and run low level air attacks, but didn't,why?Because the Russians never gave them the equipment to be eff ective.How about the IL-28 twin jet ground attack given to China/North Korea by the mid 50s;Poland,Hungary,East Germany,Rumania,Albania,Czechoslavokia, even the inept Arabs Egypt , Syria and Iraq had them by the early I960s; and yet if based in China(remember the Yalu River sactuary in Korea?) low level strikes would have been disasterous against shipping

Trucking and very effective against barracks housing the technicians working I on aircraft at bases such as Phan Rang ,Cam Ranh,Da Nang,Pleiku, Tan Son Nhut near Saigon.Comming in waves of 5 to 8 aircraft,at low level, they could wipe out most of the technicians maintaiming most of the air craft.American aircraft are highly complex and need constant maintainance on them and without technicians they could not fly and therefore the Amer ican Army could not last.The Americans Can turn out I00,000 aircraft a year but trained technicians take at least one to two and a half years to train and become effecient.They would have to draft engineers to make up the loss and then people would drop out of engineering;because the only reason they took it in the first place was to avoid the draft. They could also hit the fuel and bomb dumps and shipping plus the highly secret radar installations such as Monkey mountain in the I corp. area.With no "eyes" to see the Americans would have been highly vulnerble toair attacks.But this was not don ,why?They never had Il-28s,not even based in China like the korean conflict.The SU-7 fighter bomber is another plane supplied to East Germany,Poland,Rumania,Czechoslavokia,Hungary;even India and the in ept Arabs have it(Egypt,Syria andIraq) since I966-I967 but the North Viet Vietnamese have never had it ,why?TheSU-7 is a fighter bomber the Mig-2I is only a short range intercepter.The Mig-2I is also not supersonic below I5,000 feet and therefore can be outrun by Boeing 707s,747s and Douglas DC-9s,quite aplane,The TU-I6 is atwin jet medium range bomber that Indonesia had by the mid 60s with long range anti shipping missle carryed by it,the inept arabs had it in the I967 war,why have the NorthViet namese never had it.The arabs also had advance Mig-23 and SU-II intercept ors flown by the Russians since the I967 war,the north vietnamese never, why?The No. Vietnamese have been operating the ineffective SAM-2 for years, below I2,000 feet it is useless if the pilot sees it in time.It is slow in acceleration at that point from launch.The Israelis gave the U.S. of A the complete setup after the 67 war when they captured it plus a Barlock low level radar set up.So the Americans know everything it can and cannot do.The Russians set up SAM-3s,SAM-4s ,5 &6s after the 67 Arab war,but never in North Vietnam,why?Could it be that they are effective low and high level missles with a solid propellent which means faast acceleration. They would have been to effective and American casualities too high in both pilots and planes;there seems to be colusion here.The Americans mined Haiphon harbor,right, why did notRussia supply the Vietnamese with 50,000-I00,000 mines like they did to North Korea in the Korean conflict;remember when General MacArthur went to land at Inchon harbor And found it mined with 50,000 mines,it slowed him down about 3 months.Russia could have supplied the new magnetic ones ,vibrations or contact ones all around the shore

of North Vietnam and part of South Vietnam,leaving a small channel close to shore for commercial shipping, covering areas 5 to8 miles out,this would have stopped shore bombbardment by destroyers and even light cruisers.Mines,long range guns,plus one more weapon supplied to the inept arab and other countries by 1967-68-69 (but never supplied to North Vietnam) would have made off shore bombbardment impossable.This weapon is the Styx anti ship missle,whether in mobile /fixed shore installations or on the Osa or Komar patrol boats.This is the famed missle that blew the Israeli destroyer Ehliat out of the water at adistance of 17 miles ,3out of 4 being direct hits with 1 ton warheads at the tail end of the 1967 war. Its total range is 25-30 miles and very effective,and that is why it was never given to North Vietnam.The Mig-19 aground attack fighter recently(1970) seen over Vietnam,served with China and Poland,Hungary,East Germany,Czechoslavokia, the inept arabs and many other countries by the early or mid 1960s but never seen over North Vietnam till around 1970 and never in its capacity as a ground attack aircraft,why?

I noticed some thing else during my tour as a marine. Some times while gaurding the perrimiter at Da Nang or other large air bases, the barracks area would rarely be hit with rocket fire.There were 5,000 highly qualified technicians in there,plus a large N.C.O. club, a large small ranks club, storage area, hospital and yet only One or 2 rounds would land in that compound every year to year and a half; yet our side (Marine) would get clobbered.I am glad that it was programmed this way for the only place to get booze was the air force sid ;they would sign us in to their clubs/or trade us bottles for 57 pounds of steak.I have a feeling that the Viet cong are in some way brought.They hate your guts politically, but love your economics.Your Base Exchanges supply them with soaps, cigarettes,perfumes,watches tape recorders and many other goods never seen over there,let alone in the quanity seen now. Back in Chicago and Philadelphia they call it ruining them.Swarming them with goods they have never had before,getting them soft and to rely on your technology.Wave after wave went North,much of it toChina,;it took 8 years to turn Chinas head but it finally did.Vau Taug was hit only be cause the town was put off limits,as soon as it was put back on limits the base was left alone.All the women working the bases would carry tons of goods out a day: to the leagal but illeagle back marget.WE could have stopped them but had orders not to,except in rare circumstances.So we have also the one armed bandits to explain,i was on R and R in Thailand talking with a Chinese man who said that 2 Italien men from Brooklyn sod or least them to him,shades of the Gallo and the Profacci mob,juke box and one armed bandit king pins.Was'nt Vito Genovese seen with Jack Ruby with airforce and military officers,high ones at that.

A Mrs.Rich saw them there.Interresting howmany wittnesses were killed; Some well known insurance company said that it was immpossible that so many should be killed so shortly after Kennedys murder.

Two other weapons could have beened used; propeller airplanes of w.w.II age;disassembled and then smuggled to south Vietnam(even further south tha Saigon);reassembled and flown out of small airfields,comming in low from all different directions attacking air bases,fuel and bomb dumps,radar installations,ships ,troop convoys,training training barracksete.

The americans would have become so trigger happy that they would have been shooting down their own airplanes;the military effort would greatly increase and the efficientcy greatly reduced.Why was this not done?

Also sampans carrying supplies south could have homming torpedoes slung under neath them,and when stopped by destroyers/ships release them sinkin the ship,or have a frog man guide it straigh into the ship also sinking it why was this simple thing done? Collusion is the only answer.Even my Cath olic church made money off the war by investment in the stock market, Honeywell,Dow etc.The church is almost dead because it did not stand agai nst the war with enough force as it should have.It should have raged agai st the war,excommunicating anybody who went or supported the war,then peop and nations would have flocked to its side,christianity lies shattered on the beach heads of Vietnam.I said one thing when Kennedy was killed with the help of the Dallas police bigots(half belong ed to the K.K.K.); you have just slit your throats and exterminated the white race in warm weather countries,for the negro race will never stand for it.As you can se i was right,befor there was love in the air and also honor,races were mingling freely, now too many mines have been messed over by the war.Once the white race destroyed the base(law) from which it operrated from it des troyed itself for the negro turned to physical action, not listening to words anymore and generally speaking they are superior in that area. They will be slightly better because they will not lean/give so much to tech nology,but they are as prone to power/greed as anybody else.The worst thing about banning Clay from the ring was ineffect saying to the negro don't bother to develope yourselves in effect attacking quality and desire, it only suceeded in making them mad and united them.This nation will soon be 75%-80% darker skin color little in danger of attack from the Common Market allied with Russia because of their greed. Africa and South America have all the rich raw materials,an attack on one is an attack on all as the English learned when they tried to topple Franco of Spain with American help.

The thing that irks me is all the nations condem the Americans for bringing war to asia;but had one nation,no matter how small, said you won't do this to this people and stopped trading with the Amercians;other nations would soon follow suit,but no the back pocket wallet is stronger than the value of ideals.The result is a complete colaspe of faith in law and goverment and a huge raise in terrorism,crime and dope usage-WHAT YOU SOW YE SHALL ALSO REAP

Lets look at one of the hidden figures that controled the world; from London England no less.Gulben-Kian and Nubar-Kian;one of them died 6 months ago(I think Gulben) leaving 450,000,000 dollars to a foundation in Portugal and that was not the extent of his money, nobody knows how much he had total,he had 7-8 citzenships trying for Turkish in the end,also fluient in about 8 languages.He didn't live in each country 8-10 years to gain citenzenship,you buy it by starting bussinessew in the presidentes name, gifts,money, women also help.If an american opens a business down in Mexico he gets alittle more than 40% of the profits,but if he has Mexican citizenship he gets 100%,thats a big difference.After a while you make the company bigger and bigger finally making it more important than the goverment itself,you use greed to get the people on yourside,using fear of loss of job,it doesn't always work in south amercian countries.Notice how many Generals and big business men are killed or kidnapped down in my homeland every year? Oil residue feeds the electric power steam plants and is also used for aspalt on streets, isn't there much oil offshore Vietnam and in Malaysia.Aren't not hydro electric and steam plants being built in So. Vietnam affecting the water flow in rivers from China?

There is also Jonsons confession speach(L.B.J.)

Anavy buddy of mine was finally changed from Vietnam to europe, he got England(this speach has been confirmed by a few English friends of mine now living southern california).In late 1969 or early 1970 this speach was shown on a series of Kenedys murder in England and europe.

Lydon B. Johnson on stage facing crowd,sitting,: Kennedy was a great man, a brave man and I cried when he was shot,but he was naive I take the blame for every thing that has happen here this day on my shoulders, these shoulders,if Kennedy had been allowed to continue along his path this country would have faced the horrible specter of stagnent socialism.

A jelious vice president,a powerful,envios wife,and big business/C.I.A. killed J.F.K.

The world world will never see another man like him.He offered peace & love
The world chose war and profits.The future will be interresting.

The joint chiefs of staff must have drolled when they viewed Kennedys body,Johnson had done their deed for them.Ever notice how many retired Generals and Colonels end up in management in oil companies and other related military- industrial complex jobs,shining door knobs and such. The american military is now falling apart due to its dishonorable role. Russia is watching Americas declining military power with delite.The common market is also feeling the effects of the war in Vietnam by what i call the tuning fork effect.When a physical place vibrates with violence hatred over a long period,such as the immoral war in Vietnam it sets off other tuni ng forks that have potential hatred in them.Notice Ireland how can the common market work so long as that civil war goes on, and they are beyond listening to words.What if that violence should jump over to England(notice its growing crime rate)? When Franco of Spain dies isn't there plenty of fuel for revolt by the Basque nation,also when Tito of Yugoslavia dies won't the Crotes and Serbs revolt giving Russia a beautiful oppertunity to invade europe.Can europe stop them, are they strong enough? No body in america wants a military career anymore,it is dishonored and to petty over civian life. A dangerous situation.

Oswald was a bad shot,3 crack shots from the National rifle association couldn't duplicate the shooting with better rifles and at a stationary target that was closer and larger at that.Kennedy was hit in the back,near the spine,so that he would arch his back and r4veal his head and neck another bullet went throggh his tie from the front,then he was hit twice in the head from the front and then he was probably hit I or 2 more times,Connally was hit about 3 times.The effects of this foul deed will ring out for I00-I000 more years.If i back a killer in his deed i am guilty by assosiation;so it is with countries also.

Think about it.

Do you know what the big boys do with money made out of the war?They go into real estate,notice all the high rises in southern california being developed recently;also in the meteranian countries,what international companies/international citizens owned them?They are bigger than the laws of countries/they make the laws of countries and control thrir goverments. I remember Kennedy saying from the White House steps;We will not bring war to millions of defenseless Asians- a little while later he is dead;troops than rise from I6,000 to 500,000 men.

How much plainer can it be.Since the world has set aprecedent who and what countries will be next?Any nation that doesn't have nuclear weapons can be next.

Do you know how to take a countries land away from it? Simple,push it into war and make the payments in raw materials or land.My friends laugh when I say they will have the Chinese tearing down the great wall of China and building highrises,what about when the great cathedrals of Spain come crashing down and gas stations take their place,the new ruler of Spain will not be as strong as Franco so he will be easy to deal with.You notice one thing about the English,they don't make themselves part of the country or its heritage but use it for their gain-Maybe thats why they are being thrown out of Africa and South America.

Another piece of evidence was the Algens photograph,the original not the cut version, showing our beloved president grabbing his throat, Oswald in the doorway of the Texas book depository building,while a gun man is in the 2 story window of the Dal- Tex building(Altgens photograph)

The I22 and I40mm rockets are very ineffectine,shrapnel designed to go up instead od down where the troops lie,why so? The 30 pound warhead would be better used in motars or handgrenades or mines all are far more effective.

The Sam-7,shoulder fired anti aircraft missle, is another weapon t that did not make an apperance until after contact with China,why? It was in the Soviet arsenal by I967.

The PT-76 light tank has been around since I950 and that was all the North Vietnamese had until I970 the year of contact with China.

They will in future years try and depriaate Kennedys name , he was a communist,naive or their would have been a third world war had he stayed in power; all are false,their are leagle means to get a per son out of power-He offered honor and freedom of choice and real democracy Even had Russia threaten pre emptive strikes against China-Nothing but Nothing justfies the killing of that great man.

It is true that there would have been some form of socialism under Kennedy,but it would have come in under a head of love and honor you can do any thing with that base,now it will come in under a head of hate, no energy, very little money and screwed over mines.Hardly a base for construtive work.Millions of men who have seen killing,done the same on drugs ,whiskey who can't afford to think-little work back home,but they will remember their trade learned in Viet nam-Think about it.

What does Kennedys death have to do with the state of the world to day-EVERYTHING-Maybe even the end of the world is in sight from that deed. I wouldn't have [illegible] Big bussiness uses people beau tifully,doesn't it? The degeneration of the world starts with Kennedys death;how far will it contonue?

Have you ever noticed that sometimes when a big base closes down that English advisors are the last to go.Is America the brawn and the English the brains?

Why i find it hard to believe that the Europan Common Market will work so well is the fact that each country will have to change their heritage/ways or quality of life- will Franco of Spain watch England beat down the Catholics of Ireland(Or Italy for that matter),will he kiss the feet of England - Will the English Queen kiss the Popes feet?- Will the Norwegians allow their beautiful fiords and waterfalls to be blocked up, polluted,and used to generate power for the rest of the common market? Will they allow their forrest to be cut down so that paperbacks magazines can be made out of them-Is the advancement of technology worth the sacra fice of individuality,pollution and consumption of ones natural resources for the profit of a few?

Have you ever noticed that the American news media is controlled almost completely by the U.P.I. and A.P.(United Press Internatio nal- Associated Press),you wonder who runs them or influences them-The C.I.A. backed by big business?

You know to controll the U.S. of A. it would take only about 30 positions.The president-the U.P.I. & A.P.- A few few seats on the Surpreme Court- the head of congress & the senate, leadership of a few choice congressional and senate committies, a few seats on the committie of foreign relations(Isn't the millionaire oilman Kerr on this committie?).How much easier than defeating their armies.

After running the armed forces of the Amercians into the ground as the airforce is now finding out,and the Navy might soon find out now that thr Russians are supplying them with Komar missle boats with stynx anti shipping missles,notice they waitted for 2 years after China was contained but supplied Egypt with them in 1967.

The question is nuclear war possible when Nuclear armed China with 850,000,000 men has treaties with African nations having much wealth and manpower itself?I think that the bigots and power men have put themselves in a corner,they can't start a nuclear war with out destroying themselves and property and yet the last 9 years have bred an anialism in the heads of youth and Vietnam war verterans thatb words alone can never change.Their children and grand children must also be effective by this deed & prevailing atmosphere.People are through with goverments they have no voice in or control over.When people & races can't be trueful to each other civilization is over.Ah its to bad that business only looks at its physical growth charts,it is now paying for it by the crimerate which is small at the present,think about it.The war has said :Economics is over life and has destroyed senseativity
